## PROJECTS

### C++ CHAMPION WEBSITE - [WEBSITE](#)

- Created a comprehensive C++ resource website using HTML, CSS, PHP, and MySQL to provide students with easy access to free resources and save time.
- It was curated with a collection of high-quality C++ resources, including books in PDF format.
- This project allowed me to strengthen my technical skills in web development and gain experience in project management.

### MOODIFY (SPOTIFY-CLONE) [WEBSITE](#)

- Built a small-scale Spotify clone named Moodify, using HTML, CSS, and JavaScript.
- Successfully developed a functional small-scale Spotify clone, which increased proficiency with web development technologies and improved problem-solving skills.
- Demonstrated my technical proficiency, and creativity.

### TEXT-WIZARD — [LINK](#)

- Text Wizard is a powerful and user-friendly text editing tool that provides a comprehensive set of features for basic and advanced text editing tasks.
- The tool is visually appealing, intuitive, and prioritizes privacy and security.
- As the sole developer, I am committed to providing the best possible service and incorporating user feedback to continuously improve Text Wizard.
